with GS **GLOW** Paint**

Safety Hard Hats

Day

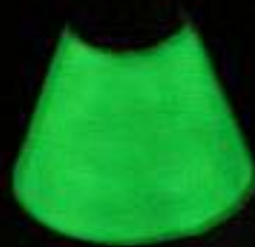

Night (No Lights)

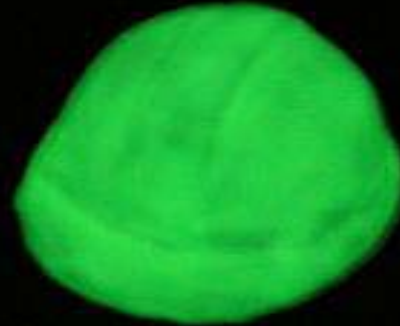

Safety Hard Hats painted the GS
GLOW Paint

Safety Products

Traffic Cone

Hard Hat

Both Items painted with GS **GLOW** Paint and placed in total darkness

Photo Luminescent Principles

Photo Luminescent products absorb ultra-violet light energy from a UV light emitting source (best source is sunlight). After a short exposure period (in direct sunlight as little as 10-20 seconds) the energy stored in the photo luminescent crystals will emit a **GLOW**. Depending on the light source, and duration, the release time (**glow time**) can be several hours.

Our **Photo Luminescent** Products

- Exceeds ANSA/ISEA 107-1999 USA Standards and is a Class A1.
- Luminosity significantly exceeds Mil Standard 3891 B
- Cost Effective
- Easy to Use
